

macOS Keyboard Shortcuts

Modifier symbols:  Command,  Option,  Control,  Shift,  Delete,  Return,  Esc. Most system shortcuts are -based; the exceptions are noted.

Essentials

Keys	Action
 C /  V /  X	copy / paste / cut
 Z /   Z	undo / redo
 A	select all
 F	find in the current app
 Space	Spotlight search
 Tab	switch between apps
 `  ``	cycle windows of the current app
  Space	emoji & symbol picker

Windows & Apps

Keys	Action
 N /  T	new window / new tab
 W /  Q	close window / quit app
 M	minimize window
 H /   H	hide app / hide all others
  	Force Quit dialog
 	Mission Control
  /  	move one Space right / left
  F	toggle full screen

Editing Text

Keys	Action
<code>⌘ ← / ⌘ →</code>	jump to start / end of line
<code>⌘ ← / ⌘ →</code>	move one word left / right
<code>⌘ ↑ / ⌘ ↓</code>	jump to start / end of document
<code>⌘ ⌫</code>	delete the previous word
<code>⌘ ⌫</code>	delete to the start of the line
<code>fn ⌫</code>	forward delete
<code>^ K</code>	delete to end of line (Emacs-style)

Screenshots & Screen

Keys	Captures
<code>↑ ⌘ 3</code>	the entire screen
<code>↑ ⌘ 4</code>	a selection you drag
<code>↑ ⌘ 4 then Space</code>	a specific window
<code>↑ ⌘ 5</code>	the capture & screen-record toolbar
<code>^ ⌘ Q</code>	lock the screen

Hold ^ to copy instead of save. Add `^` (Control) to any screenshot shortcut — e.g. `^ ↑ ⌘ 4` — and the capture goes to the clipboard instead of a file on the Desktop.

Finder

Keys	Action
⇧ ⌘ N	new folder
⌘ ⇧ ⌫	move selection to Trash
⌘ I	Get Info
⌘ D	duplicate
Space	Quick Look preview
⇧ ⌘ .	show / hide hidden files
⇧ ⌘ G	go to a folder path
