

File Management

- 1 Declutter your devices by removing unnecessary files and apps.
- 2 Reorganize your most-used apps and categorize them into easy-to-access folders.
- 3 Organize your PC's files in to folders that are sorted by category or date.
- 4 Back up your important files like birth certificates, bank statements, and your resume. Use encryption.
- 5 Embrace cloud computing by storing your files and folders via online storage.
- 6 Name your files and photos so you can easily find them.

Social Media

- 7 Remove the social media accounts that you no longer use or are easily distracted by.
- 8 Find offline alternatives to social media and arrange to socialize with your friends and family in-person.
- 9 Stop reacting to posts on social media and step away from any potential arguments.
- 10 Unfollow people on your social media platforms you no longer have an interest in.

Desktop Customization

- 11 Tidy up your desktop by using a simple skin from Rainmeter.
- 12 Install software updates and apps in one go using software like Ninite to stop you from becoming too distracted.
- 13 Organize your desktop by adding only necessary apps and programs.

Emails

- 14 Delete unused or unwanted emails once a day to stop your inbox from getting cluttered.
- 15 Unsubscribe from useless newsletters.
- 16 Make an effort to check your emails at specific times, removing the temptation to continuously check.

Mobile Phones

- 17 Turn off notifications that you waste too much time checking.
- 18 Hide your phone away or put it in a drawer for a small amount of time each day or week.
- 19 Go through your contacts and remove numbers that you don't recognize or need.
- 20 Change your phone's theme to black and white or grayscale to remove the enticing colors and vibrancy.
- 21 Download the right apps on your phone, like the Moment app which tracks your iPhone and iPad usage per day.
- 22 During your commute, keep your phone out of sight and enjoy the scenery or bustle around you.
- 23 Remove any work apps or work emails from your personal phone.
- 24 Train yourself to ignore the fear of missing out by not checking or responding to notifications so quickly.
- 25 Avoid starting and ending your day by checking your phone.
- 26 Use your phone for its purpose rather than to kill time.

Web Browsing

- 27 Keep track of all your passwords by using a password manager.
- 28 Minimize your website accounts and close any that you no longer use.
- 29 Track your time spent online with a useful tool like Toggl to make you more accountable.
- 30 At the end of the day or evening, close all of your tabs.
- 31 Set internet-free time aside by disabling your internet connection or sticking to a schedule.

Digital Detox

- 32 Take yourself away from the digital world for one day once a week, bi-weekly, or monthly.
- 33 Combine your digital chores and eliminate them in one sitting of one hour per day.
- 34 Place your tech devices in a different room so that you can turn off from technology.
- 35 List all of your digital devices and remove any that are not necessary.
- 36 Set an end time to step away from all digital material per day.
- 37 During the day, limit yourself to one screen at a time.
- 38 Limit your screen time and ensure you offer yourself a five-minute break every hour.
- 39 Take a walk in the fresh air once a day.
- 40 Make a list of your hobbies or new interests that you want to explore.
- 41 During quieter periods, indulge in an educational activity like reading.
- 42 Engage more in physical activities that allow you to relieve stress and promote a healthier lifestyle.
- 43 Hold yourself accountable and consider whether you really need to take your phone/tablet/laptop with you.
