¹Use in **Quick Open** panel.

²Preview window shows PDF by default. Select relevant export format from dropdown menu in title bar for corresponding preview.

³Shortcut is available only when preview window is open.

⁴Shortcut deletes sheet immediately without sending it to Trash.

⁵If focus is in Sheet List, popover panel appears and if focus is in Editor, sidebar panel appears.

⁶Shortcut cycles through available actions when used multiple times.

⁷**Favorites** group appears in **Library** only when there are one or more favorited sheets.

⁸Use shortcut after opening **Find** panel or **Find and Replace** panel.

⁹Search looks for keywords in Sheet List and Editor.

¹⁰Shortcut works only when panel is in focus.

¹¹Refers to Split View in Ulysses and not system-wide Split View option on macOS. However, shortcut works with both options.
